

Coloretto

The Limit Cards

Note: Please use the original rules with the following exceptions.

Preparation

- 👉 remove the 3 jokers from the deck and place them back in the box
- 👉 shuffle the 6 limit cards and place them face down as a draw pile on the table
- 👉 reveal the top limit card - this card applies to the following game

Playing the game

The limit card changes the conditions for the current game. The number in the upper red circle indicates the number of scoring rows (instead of colors) that score plus points.

Important: When playing with the limit cards, '+2' cards are also placed as scoring rows.

The number in the lower red circle indicates the maximum number of cards in a scoring row. If a player collects more cards of that type, he has to place them in a new scoring row.

Important: This also applies to '+2' cards.

The crossed out circle means that there is no limit for the number of cards in a scoring row when playing with this limit card.

Scoring

Depending on the current limit card the players choose the scoring rows to score plus points. All other scoring rows score minus points.

If a '+2' scoring row is scored as plus points, each of these '+2' cards scores 2 plus points as usual.

If a '+2' scoring row is scored as minus points, each of these '+2' cards scores 2 minus points.

← scoring rows that score plus points: 5

← max. number of cards per scoring row: 3

Scoring example: The player decides to score plus points for the scoring rows A, B, C, E and F. He scores $6+6+6+6+6 = 30$ plus points. For the scoring rows D and G the player scores minus points. He scores $3+4 = 7$ minus points. His total score is 23 points.
