7Seas

You have sailed the Seven Seas and braved all storms, always searching for lost riches and treasures. Bärenstich

Who can resist the sweet scent of honey filling the woods? The bears are certainly blown away by it and start their search for the liquid gold. The more bees surround them, the closer they get! But beware: Coming too close to the beehive will earn you quite a few stings!

>> To me, every game is a work of art and an incoparable medium, since it can only come to life, if players contribute to it. Because man is part of this work of art. <<

WOLFGANG KRAMER has been developing board games since 1973, since 1989 even full-time. As of now, more than 300 of his games have been published and honored with numerous prizes, including five "Spiel des Jahres" awards. Many times, he has worked together with other authors, but our new release "Bärenstich" has been a solo project.

TEAM3 green/pink

„Speak nothing, hear nothing, see nothing.“ (Based loosely on a Japanese proverb)

In TEAM3, a team of 3 players works together to build a structure. But how is that supposed to work if the architect (the one who knows the blueprint) must not speak, the supervisor (the one who needs to describe what has to be done) only sees the wildly gesticulating architect, and the builder (who eventually has to build the structure) can't see anything? The answer is: with teamwork, chaos, and plenty of fun!

TEAM3 is available in 2 versions - a green one and a pink one - with different cards. On top of that, each version also contains its own mini-expansion. For even more variation, you can also combine both versions.
